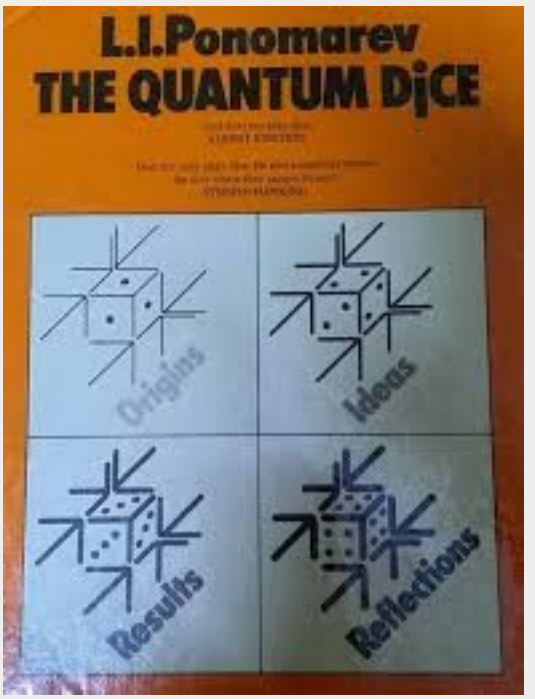
Today’s News Special



I argue, L.I. Ponomorev here, that the best part about the Indian recent Communism, is daily life science. I wake up and follow the radio and

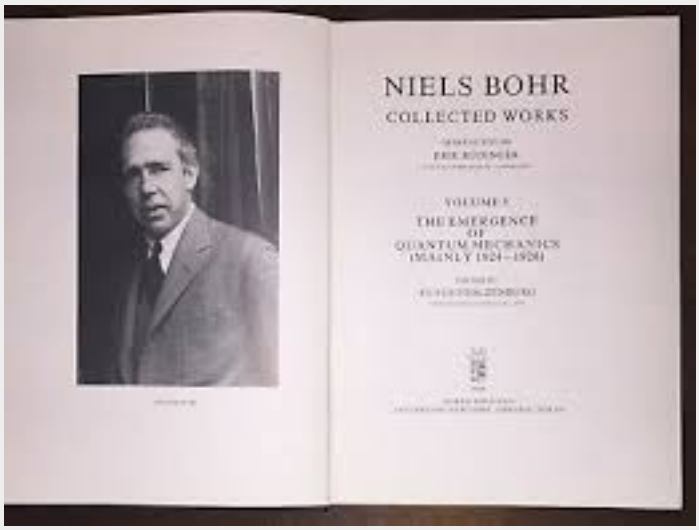
s

I. CPSU here –

What then do you L.I. Ponomorev think about daily life science, we see it as creative with Sirohi, that we follow elementary works and types of science creativity, what then is better than following the computer and the fax with phones and radios and follow quantum dice.

II. Ponomorev –

I argue one constellation in quantum physics is then one pattern of quantum dice



See a Complex Movement in a Camera

Many movements of cinematic and perceptive changes and qualities.

Now I articulate this to Istabal Mesravan who calls in fact photo viewings and images in a photograph.

The radio.

I also mean quantum dice has many patterns, something like a complex pattern which is horses after horses and arches after arches and complex forms of waves and smaller dice throws and all of this is quantum dice –

Many cinematic people and many streets and many connected phones and radios and many people in their

See it all become a cinema journalism.
